

REMARKS

The title, summary of the invention and abstract have been amended to reflect the scope of the new claims previously added.

The first paragraph of the specification had been amended to indicate the patent number of the issued parent application. A missing period and extra spaces between the two sentences have been added.

In paragraph 20, interleaved has been inserted before “discs 30” and no new matter has been added via this insertion as this relationship of the discs 30 on adjacent shafts 22 is clearly illustrated in Figs. 2 and 8 and the term “interleaved” also appears in this context in paragraph 29 of the application as originally filed.

In paragraph 33, ~~V-screen~~ has been changed to V-shaped to correct an inadvertent error. There are numerous references to a “V-shaped” frame throughout the specification as originally filed, and accordingly, no new matter has been added.

In paragraph 35, I has been changed to we, and ~~my~~ has been changed to our to reflect the fact that this application names co-inventors.

Action on the merits of this application is solicited.

Respectfully submitted,

 11/15/04
